

[Everyone Can Code](#) - At Apple, we believe coding is a core literacy that everyone should have the opportunity to learn. So we designed the Everyone Can Code program to give everyone the power to learn, write, and teach coding. Everyone Can Code includes a free comprehensive curriculum that takes students all the way from no coding experience to building their first apps.

[Everyone Can Create](#) - We also know that creativity needs to be nurtured, and nowhere is that more important than in the classroom. That's why we designed Everyone Can Create, a new program that helps students develop and communicate their ideas through music, drawing, photos, and video with iPad. It includes free project guides with a range of activities for students to learn vocabulary and techniques in a specific medium through fun projects. We also created a Teacher Guide with 300 ideas on how to integrate the projects from each medium into math, literacy and literature, history and social studies, science, and coding.

[Augmented Reality](#) - With AR on iPad, students can connect their learning to the world in new ways. AR apps on iPad turn a classroom into the cosmos, make a history lesson as vivid as the present, and let students peer inside everyday objects to understand how they're put together. iPad is built to move and is packed with advanced technologies like accelerometers, powerful cameras, and an operating system designed with AR specifically in mind. All together, AR on iPad creates an experience that's simply not possible on other platforms.

[Classroom App](#) - The Classroom app is a versatile teaching assistant that puts teachers in charge of every iPad in their classroom, so the teacher can keep students focused even when they're working on different tasks. Teachers can readily share information with their class by using the app to send and receive documents or display student work on a big screen. And the app is available for use on Mac with the same great features to help teachers guide their students' iPad devices.

[Apple Teacher](#) - Apple Teacher is a free professional learning program designed to support and celebrate educators using Apple products for teaching and learning. As an educator you can build skills on iPad and Mac that directly apply to activities with your students, earn recognition for the new things you learn, and be rewarded for the great work you do every day.

[Apple Distinguished Schools](#) - Apple Distinguished Schools are centers of leadership and educational excellence that demonstrate Apple's vision for learning with technology — and we believe they are some of the most innovative schools in the world.
